Re: Mandatory Water Meter Replacement Project

Dear Homeowner or Resident,

The Greenlawn Water District has contracted with Saks Metering to conduct a District-wide water meter upgrade project. Authorized installers from Saks Metering will be working in the community with photo identification, car signs, and company uniforms to perform this important project. Typically, the upgrade of your water meter should take no more than an hour to complete. You may experience a temporary water disruption.

Most water meters in the Greenlawn Water District are located in an outside pit, usually in front of the property. If the water meter is located outside, residents do not have to be home to receive the upgrade.

Should you have any questions or concerns regarding this project, don't hesitate to contact the Greenlawn Water District at the number provided below, or Saks Metering at 516-453-2922, at any time. We also urge you to visit the contractor's website at www.SaksMetering.com to view a FAQ video that can provide answers to many questions you may have.

We thank you, in advance, for your cooperation.

Sincerely,
GREENLAWN WATER DISTRICT

Robert Santoriello
Superintendent
