RE: Water Meter Repair Notification

Dear Resident:

Recently your water meter has been changed to be compatible with the town's new billing system. The Yorktown Water district has discovered that there is a factory defect to the water meters that were installed. In order to ensure that your water bill will accurately reflect your water consumption, the defective part needs to be replaced. The repair should take no longer than 15 minutes and your water service will not be interrupted although access to your meter is required.

Saks Metering will be responsible to make the necessary repair and therefore will be contacting you shortly to schedule an appointment. Should you want to make an appointment yourself, feel free to call them at 914-502-3333 or email info@saksmetering.com.

We thank you in advance for your cooperation and apologize for any inconvenience.

Sincerely,
